

GlowPost AI – App Summary for Development

GlowPost AI is a modern social media content creation and planning app designed for creators, influencers, and businesses.

The app helps users create high-quality posts and organize their monthly content in one place.

Core Features:

1. Content Generator

Users can generate social media post ideas manually (no AI required), including:

Captions

Hashtags

Carousel ideas

Reel scripts

Image prompts

2. Content Scheduler

Users can schedule their posts for future dates.

The app will remind them when it's time to post (device notifications or backend reminders).

3. Calendar View

A monthly calendar showing all scheduled posts with color-coded indicators.

4. Drafts & Saved Posts

Users can save posts, edit them later, and organize them.

5. Brand Settings

Users can set:

Tone

Keywords

Brand notes

Colors

This helps keep their content consistent.

6. Clean Neon UI

The app uses a dark neon theme with modern UI components that make the experience stylish and creator-friendly.

Purpose of the App:

GlowPost AI helps users plan their reels, posts, stories, and captions in advance — making content creation easier, faster, and more organized.

Tech Stack (Flexible):

Frontend: Flutter or React (exportable)

Backend : Node.js

Revenue Streams for GlowPost AI

Subscription Plans (Main Revenue)

Users pay monthly or yearly for premium features.

Example plans:

Free Plan – limited features

Basic ₹199/month
